

Covid-19 Relief & Recovery Plan For Black America

Black people represent just 13% of the country's population but nearly 30% of total Coronavirus cases and 16% of total deaths -- we are dying at higher rates than any other group in the country. With over 60,000 Black lives lost, nearly half of our small businesses permanently closed, and the daily burden of rising unemployment and insecure housing, our communities demand action.

We need a plan that protects us, provides access to the care we need, and that builds new infrastructure to address the crises facing us. It's time to change the rules and make new ones that work for us. That's why we've developed our Covid-19 Relief and Recovery Plan for Black America -- a policy platform that demands immediate care and relief for our communities.

We're calling on Congress to immediately pass the American Rescue Plan and adopt our Covid-19 plan to strengthen it across four major areas, where it falls short: the economy, housing, healthcare, and democracy rights. Download our toolkit and help us spread the word -- Together, we will win!
